

Facilities committee minutes

October 29th, 2015

Joe Phelan, Tom Burnell, Mark Fleischhauer, Diane Lyons, Lisa Rosenthal, Sheldon Tieder

The committee spent most of the meeting taking an initial look at the building condition survey from Tetra Tech. This is required by schools once every five years by SED. Once Sheldon has a chance to go over the report he will meet with the company to discuss the report line by line. Sheldon will then prioritize the needs and the committee will discuss them at our next meeting. This would keep the timeline on track for an October 2016 referendum if needed.

Sheldon updated the committee that 4 exterior cameras at CLS will be up and running this week.

The committee discussed a concern about security issues around community members using the track during school hours. It was felt that allowing the community to use the track does not pose a significant security risk since the staff is outside with students and generally knows the community members.

Next meeting: November 18th.

Respectfully submitted by Diane Lyons
