

4.4.2

Long Range Planning Committee

Minutes December 18th 2018

Present: Joe Phelan, Tom Burnell, Laura Schulkind, Steve Jenkins, Diane Lyons

Tom discussed the new accounting software with the committee and how it can benefit long range planning. The new software nVision will allow Tom to code expenditures in a very detailed way. The current system does not allow this. The question is how detailed to get as this will be very labor intensive in the beginning. The committee felt that even though it will be more work in the beginning it will improve the budget process and make less work down the line.

The committee reviewed some examples of proposals for consulting services from other districts. We are looking into what might serve our needs the best.

The final meeting of the Community Advisory committee is January 9th.

Next meeting January 17th

Diane Lyons
