

4.3.3

Long Range Planning Committee Meeting Minutes
January 17, 2019

Attendees: Laura Schulkind, Diane Lyons, Joe Phalen, Steve Jenkins. Absent Tom Burnell

Citizen's Advisory Committee Meeting

The committee reviewed the progress made at the last CAC meeting. The 3 groups looked through all the innovation suggestions and came up with 2 main categories for improving what the district is already doing for students. The first area was around career exposure, internships, mentoring, etc. The 2nd one involved creating a "plan" that would teach kids more at their level and tracking this "plan" across their tenure through the district. Joe to discuss with Ed and curriculum tasked with figuring out if this can start to be implemented for next school year.

In addition, the concept of a teacher advisory cam up. This was something the district had a long time ago and worked very well. Teachers would have a group of students that they meet with in an effort to form a trusting relationship that students could discuss social/emotional, etc issues. Joe to talk to John and see if this is something he can achieve in revenue neutral way.

Next Meeting TBD
